

# EKlight

## Modular Keyboard

**Control up to 4 Workstations with one single keyboard and mouse.**

**Keyboards can be linked together in order to share Workstations between two users.**

**Keypads and other modules can be added to customize keyboard.**

### Highlights

- **Control up to 4 Workstations with one sole keyboard and mouse**
- **Workstations and services can be shared between 2 Keyboards resp. users with a simple connection**
- **Functionality extendable with additional modules and keypads**
- **Wide range of emulations supported: Bloomberg, SUN etc.**

### Advantages

EKlight Keyboard enables you to control up to 4 workstations with one sole keyboard and mouse.

Wide range of keyboard types supported: PS2, USB, Bloomberg, SUN etc..

Application licences and Workstations can be shared between two or even more keyboards.

Functionality of the WEY Keyboard can be extended with accessories such as a Video Deskswitch or Video Distributor in order to control the handling of video signals from your workstations to the monitors.

### Features

#### Select PC or Service

Only one keystroke is necessary to select one of the local workstation. The active workstation is indicated by LEDs.

#### Share workstations

Two keyboards linked together allow sharing several workstations between two or more users. Status of the shared workstation is indicated by LEDs when it is in use.

#### Extended sharing

With a WEY Deskswitch KMVA 4x4/8x8, up to 8 workstations can be linked together resp. shared by 8 users.

Video signal of connected workstations is distributed to each desk.

#### Audio

Audio signal from the workstations can be routed to 2 integrated speakers or to external speakers (connected to keyboard).

#### Modules

Keyboard's functionality can be enlarged by several accessories like keypads, Video Deskswitches, etc.

Keys on the keypads are programmable with macros or specific hot key functions by external software.

### Keyboard Accessories

Keyboard can be customised with several accessories to suit your needs:

#### • Keypads

Several Keypads available (Bloomberg, SUN, etc.).

#### • One multifunctional Cable

4 x USB, 1 x PS/2, D-Link, Share Port, Binary Lines (RES Line) to connect to PC peripheral interfaces and devices.

#### • Video Deskswitch

Extend keyboard functionality by other modules, e.g. 2:1 Video Deskswitch.

#### • Deskswitch KMVA 4x4 / 8x8

Extend sharing range from 2 users to max. 8 users with our Deskswitch KMVA product line.

## Sharing

Two users can share their workstations by linking keyboards together.

Each user can control his dedicated workstation and – provided it is not in use – a shared PC resp. services of another user.

In conjunction with a WEY Microsystem or Deskswitch KMVA you can share a max. of 8 workstations by a group of 8 users.

## Extended functionality

WEY provides a wide range of accessories to extend the number of applications the keyboard can deal with.

You can also combine the keyboard with a local Video Deskswitch in order to reduce the number of screens on your desk.

Thanks to the keyboard's open architecture, keys can be customised individually for special purposes and emulations.

Keypads are available to support certain applications from market data providers.

## Configuration

Keyboard can be configured by using external software for individual settings.

Clean up your trader's desk by replacing multiple keyboards ...

... with **one** WEY EKlight keyboard.
