

# Deskswitch KMVA 4x4 / 8x8

## KMVA Deskswitch Solution

**KMVA Deskswitch solution with sharing capability.**

**Control and share up to 8 PCs by max. 8 users over a standard PS2 keyboard and mouse.**

**A wide range of applications feasible for high flexibility.**

### Highlights

- Share or slave PCs for up to 8 users
- Inputs for 4 or 8 PCs
- Outputs for 4 or 8 users/desks
- PCs with single, dual or quad video outputs supported
- Configuration by Dipswitches or optionally via PC and software for more flexibility

Deskswitch 8x8 chassis 19" 3U

### Advantages

Compared to other KMVA solutions without sharing possibilities, the WEY Deskswitch enables you to control up to 8 PCs of 8 users/locations.

Deskswitch can be used to control different PCs over one keyboard/mouse or to share PCs between several users.

### Features

#### Switched links

Inputs of Deskswitch allow connecting keyboard, mouse, audio and video links (KMVA) of your PCs. Depending on configuration and control command of the respective keyboard, the desired PC will be switched to the desk.

#### Multiple monitors

PCs with single, dual or quad video outputs can be routed to your monitors.

#### Control / Selection of a PC

Control Deskswitch over a standard PC keyboard or a WEY modular keyboard. Select e.g. PC1 by pressing right- + F1.

#### Configuration

Built-in Dipswitches allow easy configuration of standard setups.

To achieve further flexibility Deskswitch can be configured over USB interface with optional configuration software.

#### Display

Status of Deskswitch, PCs and keyboard activities are indicated by LEDs and an on screen display.

### Accessories

For KMVA Deskswitch following accessories are available:

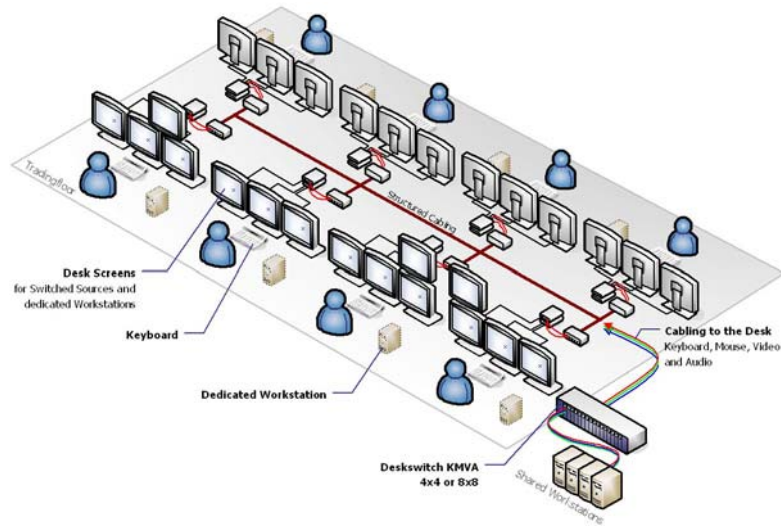

- **Configuration software**  
For more flexibility Deskswitch can be configured over USB interface with optional configuration software.
- **Cables**  
Cables are available in different lengths and types.
- **Keyboards**  
Deskswitch can be controlled by standard PS2 keyboards. For more comfort and flexibility WEY modular keyboards are available in different models (EK light, EK2000 or MK06).

## Overview

The Deskswitch can be used to share and distribute market data services between several users.

The connected Workstations can be easily maintained and supported without disturbing the traders at the desk.

## Deskswitch KMVA 4x4

The following example shows how simply two PCs, both with **single screen**, can be shared between **four users** with the Deskswitch 4x4.

The shared PCs can be accessed from any of the 4 desks (one at the time). The PCs are selected by hot keys (i.e. Win+F1 for PC one).

An on screen display informs you which PC is selected or when **another user** takes control of that PC.

## Deskswitch KMVA 8x8

This example shows how two PCs, both with **dual screen**, can be shared between **four users** with the Deskswitch 8x8.
