

MK06

Modular Keyboard

Control up to 6* Workstations with one sole keyboard and mouse.

Control and share a wide range of computers on multiple desks within a Video Switch System.

Customize Keyboard with Keypads and other modules.

Highlights

- **Colour display**
- **Personalized information on the colour display**
- **TV Video Signal can be shown on the colour display**
- **Multiple interfaces for different environments**
- **Control up to 6* Workstations over one sole keyboard and mouse**
- **Functionality extendable with additional modules and keypads**

Advantages

With MK06 Keyboard you are able to control up to 6* workstations with one sole keyboard and mouse.

Wide range of keyboard types supported: PS2, USB, Reuters Dealing, SUN etc..

Application licences and Workstations can be shared between two or even more keyboards.

Functionality of the MK06 Keyboard can be extended with accessories such as a Video Deskswitch or Video Distributor in order to control the handling of the video signals from your workstations to the monitors on your desk.

In combination with a WEY Videoswitch System you can select and control numerous dedicated, slaved or shared services such as Dealing, EBS, TV and more.

* Future Firmware upgrade will allow up to 8 Workstations

Features

Select PC or Service

Only one keystroke is required to select one of the local workstations or Services.

Share workstations

Two keyboards linked together allow sharing several workstations between two users.

Extended sharing

With a WEY Microsystem or Deskswitch KMVA 4x4/8x8 up to 8 workstations can be linked together resp. shared by 8 users.

Videoswitch control

Control several services like Reuters Dealing, EBS, TV and in-house PCs within a Videoswitch System.

Audio

Audio signal can be routed to:

- 2 integrated speakers
- external speakers or
- headphone set connected to keyboard.

Programmable Function keys

Keyboard has 24 individually programmable function keys where LCD display shows corresponding legend. Function keys are used to send commands, key codes or strings.

Modules

Keyboard's functionality can be extended by keypads, Video Deskswitches, etc..

Keyboard Accessories

Keyboard can be customised with several accessories to suit your needs:

Keypads

Several Keypads are available (SUN, Bloomberg, etc.).

Connector box

Central interface to connect workstations and other devices with keyboard.

Video Deskswitch

Extend keyboard functionality by other modules, e.g. 2:1 Video Deskswitch.

Deskswitch / Microsystem

Extend sharing range from 2 users to max. 8 users with our Deskswitch.

Other modules

Extend keyboard functionality by other modules, e.g. 2:1 Video Deskswitches or a card reader. Other modules can be developed on request.

Connector Box

Keyboard-, mouse- and audio links are connected to a central point - the Connector Box.

There are PS/2, USB and serial interfaces to support different types of devices.

Keyboard settings can be saved in Connector box. Setup can be uploaded from Connector box, if a keyboard is damaged.

With the new Connectorbox VI (forecasted by Q1/2007) further features will be available:

- Ethernet Port (i.e. file transfer, ticker)
- Video Input for the keyboard display
- Featured USB ports

Sharing

Two users can share their workstations by linking keyboards together. Each user can control his dedicated workstation and provided it is not in use, a shared PC (e.g. Reuters Dealing) resp. services of another user.

In conjunction with a WEY Microsystem you can share a max. of 8 workstations.

Extended functionality

WEY provides a wide range of accessories to extend the number of applications the keyboard can deal with. You can also combine the keyboard with a local Video Deskswitch in order to reduce the number of screens on your desk.

Thanks to the keyboard's open architecture, keys can be customised individually for special purposes and emulations.

Video Switch System

In combination with a WEY Video Switch System you can select further dedicated, slaved or shared services like: - Dealing, - EBS, - TV etc.

Services are located in a system room. Keyboard-, mouse-, video- and audio links are connected to the Videoswitch System.

With the **free seating** concept, users can logon to the Videoswitch from any desk installed with a WEY keyboard and Videoswitch connection. Access to the services is defined in user profile.

Clean up your trader's desk by replacing multiple keyboards with a single MK06
